

Tuba City

LIGHTING PROJECT

Beginning in early October, the Arizona Department of Transportation will construct roadway lighting improvements along US 160 and State Route 264 in Tuba City. The project includes the installation of 129 new street lights, which will enhance traffic safety along the roadway while also respecting the dark-sky area of Tuba City.

Work hours will be 6:30 a.m. to 4:30 p.m. Monday through Thursday. Traffic restrictions will not occur over holidays. The project is scheduled for completion in February 2011.

While crews will only be working on the side of the roadway, there may be times when shoulder closures will be required. Motorists are encouraged to use extra caution and watch for crews while driving through the work zone.
